HENRY FIELD
PRESIDENT
HENRY FIELD SEED CO.
SHENANDOAH, IOWA

Seed Catalog I have sent you for some time are all expensive so we just had to cut the pages in order to cut the prices as much as we have this year. That’s why this is the smallest Seed Catalog I have sent you for some time. But the prices are the kind you’ll like—the lowest I have offered in all my 55 years in this business. Garden Seeds at 4c a packet and so on. And it’s the same dependable quality you have had from us for so many years.

I wish I had room here to chat with you about a lot of things. After the rush season I will probably take time to write a real newsy Seed Sense and send one to you then. We’re busy, as usual. We’re eating three meals a day and are as happy and prosperous as we deserve, I guess. It seems that in the long run we get about what we deserve.

All the children are well, and even the youngest ones, John Henry and Letty, are getting to be big children. When Seed Sense is ready later this year, I’ll tell you where they all are, and what they are doing.

You may wonder why I always ask you to write to us, whether it’s satisfaction or criticism. Well, satisfied customers make us feel good, and criticism is good for us. Tell us how you like KFNF, too.

Now, if you want these new low prices kept low for next year, show your appreciation with an order. Your order will be filled promptly and carefully. And, of course, guaranteed to please you in every way. And, don’t forget to send a letter with your order.

See KFNF Radio Program, Page 52.

HENRY FIELD.
Asparagus is easy to grow

Plant seed or set plants early. This talk about trenching is all bush. Just get the roots in the ground right side up and cover 2 or 4 inches deep. That's all. Keep the weeds hoed, of course. Plant 10 inches apart in the row. Rows any convenient distance apart.

It Really Grows Like a Weed
Just give it room and decent cultivation and you can't help but succeed.

No crop first year, but a good crop next year, and plenty from then on for twenty years. Great money maker. Can't freeze out or dry out, drown or or half out. Sure income. One of the best spring tonics known.

20—Washington Rust Resistant. We have dropped all other varieties listed for years, and carry this one alone, because we believe it is the best of all varieties, developed at Cambridge, Mass., by Bureau of Plant Industry, working with Massachusetts Experiment Station. Practically immune to rust.

ASPARAGUS PLANTS—Washington Rust Resistant. The best way to get a start of Asparagus is from plants. Best size is the one-year, although some people prefer the two-year. We have both. A home garden will take 100 plants for a patch 12x10 feet. Write for prices on large lots to come by express or freight at your expense.

Green-Podded Bush Beans

108—Early Six Weeks. A long, straight pod, yields well, and carries well to market, but the pod is inclined to be tough unless it is gathered early.
109—Field's First Early, to my mind the best of the green pods. It is early, has a big, broad, irregular shaped pod, and is very pretty but of high quality makes it very popular for home use.
110—Round Pod Valentine. Has been an old standby for years. You will make no mistake in planting it.
111—Stringless Green Pod is the most popular with us among the round pod sorts. It is exceptionally tender, and as early as any Bean grown. Even when the plants are in sections, well formed, the pod is stringless. It is hardy, early and yields well.
112—Giant Stringless Green Pod. A round, green-podded variety used extensively as a commercial bean.
113—Red Kidney. A very popular shell Bean. My advice would be to plant liberally of these Beans for use during the growing season, and to supply yourself with plenty of dry Beans for Winter use.

Mrs. C. F. Perkins, Haly, Texas, Merchandise Price List, Page 31

SPECIAL OFFER—Items marked "not postpaid" will be prepaid on orders for $10.00 or more of Garden Seeds.
a white, kidney-shaped bean, sometimes called "Bird Egg." The bean is large and of a very
taste for either snap beans or
knife blade. Early and good
pod is broad and flat, about
best for Winter use. The
seeded Pole Beans. It bears
of the most popular white-
more generally used than
in Missouri. It is enormously prolific and so hardy it will often
rather flat, and is one of the
131— Dutch Caseknife. Has
130—Cutsliort or Cornhill is
102—White Wonder. This is a little white Navy Bean, and as a food crop it ranks
right at the top. In fact, we
and as a food crop it ranks
very
flat, shaped something like
a little white Navy Bean, you could not get along without
them.

POLE BEANS
136—Cutshort of Cornhill is
more generally used than
any other for "Cornhill" bean.
131—Dutch Caseknife. Has
proven it's worth and is one
of the most popular white-
seeded Pole Beans. It bears
a white, kidney-shaped bean, rather flat, and is one of the
best for Winter use. The
pod is broad and flat, about
as long and wide as a case-
knife blade. Early and good for
either snap beans or
shelling. It has a long, wrinkly pod, and tender. Pods light
green; bean is brown.
137—White-Seed Kentucky
Wonder. It is a very early
and tender variety. Pods
are rather small, round and
straight.

BUSH LIMA BEANS
126—Fordhook Bush Lima is
the best large-seeded Bush
Lima for the Middle West. The
pod is large and very
thick and the yield is de-
pendable. It is early enough
so that it has a chance to
make good. There is noth-
ing finer than these large-
seeded Limas while they are
green. Richest of all in food
value.
127—Henderson's Bush Lima. Sometimes called "Boy Lima," is the most prolific
of all the Bush Limas. Not
one of the large-seeded va-
ries. Has a small, white, flat
seed. Earlier than the
regular Limas and bears all
Summer. The bush form of
the Extra Early Pole Lima.
122—Wilson's Bush Lima. Large-seeded; early and fairly
productive.
125—White Northern. It is
larger than the Navy, rather
flat, shaped something like
a Caseknife Pole Bean, if
you know what that is. Is
profitable, and fine for baking.

FIELD BEANS
101—Great Northern. It is
larger than the Navy, rather
flat, shaped something like
a Caseknife Pole Bean, if
you know what that is. Is
profitable, and fine for baking.

POLE LIMA BEANS
110—Extra Early Lima is one of the most re-
liable Pole Beans for the Middle West. It is the
old-fashioned "Butter Bean." Henderson's Bush
Lima is a bush form of the same thing, and is
also known by some as the "Butter Bean." The
dry seed of both are exactly alike. I know of
nothing that will outyield this Bean. The great-
est point with it is that you are always sure of
a crop.
111—King of the Garden Lima. Is among the
large white Limas. For food value it has no
equal except in Limas in its own particular class.
Sometimes it is a little late for this section and
will not make a crop. If this is the case with you, grow Bush Limas.

BEANS PRICES—POSTPAID
Oz. 1/4 lb. 1 lb. 5 lbs. 10 lbs.

SPECIAL OFFER—Items marked "not postpaid" will be prepayed on orders for $10.00 or more of Garden Seeds.

BEETS
Rich soil is important in growing Beets if you want car mines and quality. For first crop plant early as you can
make garden later plantings three or four weeks apart. The var-
ties we list cover all types and answer every purpose.

601—Blood Turnip is an
old standard variety, medium size, bright red
flesh, zoned with white, good keeper and for
Winter use should be planted during the latter
part of June.
Early Cabbage

522—Early Jersey Wakefield. Has been at the head of the list for over 22 years, almost sure to head. Grow's fair size, as high as 6 to 8 lbs. Pointed or conical shape. Slightly thicker leaves. Stands frost well. Has small leaves and can be planted a foot apart in rows.

523—Golden Acre. New variety and a good one. Very early. Mellow, Italian, and hard headed. Fine quality. Count on a uniform head from every plant if soil and care are the same.

555—Inopec, Yellows Resistant Copenhagen. Especially successful in Yellow Disease, which now appears all over the Corn belt, and may be expected to bother anywhere in the dry season. This variety has proven satisfactory against Yellows in several localities.

516—All-Head Early. Largest of the flat-head early type. About a week later than Early Jersey Wakefield, but slightly larger and stands longer before bursting. Slightly rounded head, I have raised them 17 lbs. each. Sure to head.

518—Charleston or Late Wakefield. Is simply a large selection from the true Early Jersey Wakefield.

519—Copenhagen. Variety from Denmark, quite early, good size. Just like 15 years ago, I believe. Follows right after the Wakefield in season.

to head; medium size and round, sweet, tender—just the best quality all around. Although an early sort, it will keep well for winter.

- **Silver Nugget**: For the family wanting a cabbage head just big enough for one meal. Early Danish sort. Small, round, very solid head. Can be set closer than others.

- **Early Flat Dutch**: An early flathead.

---

**LATE CABBAGE**

Hollander or Danish Ballhead

Lettuce is used. Plant same time you do your late turnips. Full cultural directions with each package.

**CUCUMBERS**

**CAULIFLOWER**

Someone has said that “Cauliflower is a cabbage with a college education.”

- **Dry Weather or Copenhagen**: If you have any trouble growing Cauliflower, it might be well for you to try this variety, for it seems to be able to stand all kinds of grief.

- **Early Snowball**: Earliest of all standard varieties. Small, very early, pure white, and always sure to head.

---

**CARROTS**

In greatest demand

**Shenandoah Tires**

---

**CELERY**

Many people do not know what good Celery is. They have never raised it because they have never grown it. Celery, fresh from the garden. It is not hard to grow.

---

**SPECIAL OFFER**: Items marked “not postpaid” will be prepaid on orders for $10.00 or more of Garden Seeds.
SPECIAL OFFER—Items marked "not postpaid" will be prepaid on orders for $10.00 or more of Garden Seeds.

MORE CUCUMBERS
351—Early Cluster. When ready for the table it is from 3 to 5 inches long and makes a good slicer.
352—Early Russian. Extra early. Turns yellow quick- ly so should be used while comparatively small.
359—Japanese Climbing. Develops tendrils and will cling to a trellis or support

WATCH-EM-GROW.
House plant fertil- izer. Full directions on each can. 50c per can, postpaid.

CABBAGE
Henderson’s Perfected White Spine
of some kind. Produces long slices.
361—Long Green or Improved Long Green. A slicer but used a great deal as an all-purpose variety.
355—White Spine. Medium length, tapering, and shades to a lighter green at the end.

EGGPLANT
There is no other vegetable that quite equals it when properly prepared for the table. Plant and tend the same as peas.

LETTUCE
511—Policehead. Color a mixture of red and green. Leaves are very thin and tender. Sometimes called "Beef- steak" or "All Cream."
509—Black Seeded Simpson. The most popular of all for early use. Does not make a head, but a loose bunch of tender, light green or creamy leaves. Of delicious flavor and grows easily.
512—Cabbage Head. A round, firm, well-bleached head of unusual quality. Trial ground re- ports say, "Quality excellent; delicate, sweet, buttery in flavor." It is not a shipping variety, as it lacks substance, but that makes it all the better for home use.
505—California Cream Butter. A small early variety, smooth leaf, cabbage-head type. Quality good.
510—Grand Rapids is something like Simpson except the leaves are crinkled and curled much more.

MUSKMELONS
or Cantaloupes
329—California Cream Cantaloupe. In the old-fashioned "Muskmelon" we grow when we were boys. Yellow skin and yellow flesh.

EDWARD’S PERFECTO. Heavy netted. Flesh is a salmon color and of splendid quality.
331—Extra Early Hackensack. A deep pinked large, green-fleshed Mel- on of fair quality.

FIELD’S DAISY. It is not classed as a shipping Melon; still is shipped and hauled to neighboring towns quite successfully. Above all, a Melon for home use and local markets. Smooth, dark green, very little net, rich orange colored flesh and of the very finest quality. Fairly melts in your mouth and is good clear to the rind. Six or seven inches in diameter and weighs about 5 lbs. each.

CUCUMBER PRICES
Postpaid Not Postpaid
351—Early Cluster $0.60 $0.55 $0.75 $0.70 $0.65
352—Early Russian $0.60 $0.55 $0.75 $0.70 $0.65
358—Everbearing $0.60 $0.55 $0.75 $0.70 $0.68
359—Japanese Climbing $0.60 $0.55 $0.75 $0.70 $0.68

504—Field’s Dairy $0.40 $0.35 $0.50 $0.45 $0.40

530—The Abbott’s Pearl. It is a small Melon, yellow skin and yellow flesh. It is the Rocky Ford size but yellow instead of green.
341—Bannana. Resembles a very large banana. Flesh yellow and of fair quality.
342—Barrell’s Gem. Larger than the Rocky Ford, oblong in shape and inclined to crack at the end. Flesh a deep pink.

351—Extra Early Hackensack. A deep pinked large, green-fleshed Mel- on of fair quality.
353—Field’s Dairy. It is not classed as a shipping Melon; still is shipped and hauled to neighboring towns quite successfully. Above all, a Melon for home use and local markets. Smooth, dark green, very little net, rich orange colored flesh and of the very finest quality. Fairly melts in your mouth and is good clear to the rind. Six or seven inches in diameter and weighs about 5 lbs. each.
MORE MUSKMELONS

331—Greeley Wonder. I happened to be in
Greeley several years ago and dined at the
hotel where I stopped. I always liked Melons,
so I ordered some and was surprised when
my server brought me a Melon that almost
damaged the plate. The Melon must have been
seven or eight inches in diameter and the
flesh fully two inches thick and a rich orange
color. The quality was simply delicious, just
as good as it looked, if not better. I went

Hearts of Gold Muskmelon farmed near Rocky Ford. City markets.

355—Hale's Best. One of the three best and most popular
commercial varieties of Rocky Ford Melons. One
is rather uneven in shape and surface, but vigorous, productive, fine
flavor, salmon flesh. Has grown in popularity as fast or faster
than any other variety ever introduced.

356—Honey Ball. This Melon is a cross be¬
tween the old Texas Canon Ball and the
Honey. It is five to six inches through
round, smooth, no ribs, white skin like all
Cantaloupes or Honey Dew, very thick, green
flesh and a most delicious flavor.

353—Honey Dew. Most people like them be¬
ter than any of the other Cantaloupes. Six
or eight inches in diameter, a smooth, hard,
white rind and green flesh.

303—Riverside Sweet Spanish
Musa persica. Slightly ribbed and netted; flesh a rich orange and
flava; no seeds. Sometimes a little soft at
maturity.

304—Giant Prizetaker. It is very early, and used mostly for
pickles. Some varieties have been introduced
before this one. Yet it is a very unusual size.

305—Large Red Globe. Has all the
qualities of the large Red Globe Onion, but does not keep well.

306—Mountain Danvers. An Onion
that will mature properly, ripe up hard
and solid without any thick
tissue or sprouty stock. Good size,
good bright color, a good keeper and
always clean. The plot at Wellsfield
is the one where you are located, if
you want an early and a good keep¬
ning Onion.

307—New Queen. A white Onion,
very early, and used mostly for
pickles.

308—Ohio Yellow Globe. Used largely for pickles.

310—Silver King. Some prefer white sets to red
sets. None

311—Silverskin or White Portugal. A medium
cottle Onion. For
home use it is just as good or better
than others.

312—Southport White Globe. A late main
crop variety, medium size, solid and a good
keeper. The flesh is a very fine grained and a long keeper.

313—Silver Klutsker. A medium size.

314—Yellow Globe Danvers... 314—Yellow Globe Danvers...

315—Pollock's Ten-Twenty-Five. Thick
flesh, cuts well, packs well, and car¬
ries well. It meets the specifications of the most exacting grow¬
er and shipper, and the consumer is just as enthusiastic. For
the home grower, if you like a small Melon, you can't beat it.

341—Osage. A medium sized Melon, slightly
smaller than a Rocky Ford. Salmon tinted
flesh, not as long a keeper, but makes up in quality
and appearance, and has the standard
size that has been
since, and it
gets better
year after year.

342—Perfection. One of the finest Melons that seems
to be growing in popularity now as years ago
when first intro¬
duced. Large, very
well netted, showy
Musa persica. Yel¬
low skin, orange col¬
ored flesh. Attractive appearance, fragrance has been
increased and the East. This
means that it will
keep and is an attrac¬
tive market va¬
sion of the other varieties.

343—Pollock's 12-25. Thick
flesh, sometimes a little soft at blos¬
mation, and high quality
and resistance to Onion troubles than this one. Is
larger than a Rocky Ford. Is used to supply a fancy trade in
city markets.

316—Mountain Red Globe is grown by the
same man who has grown the Mountain
Red Globe for many years. Grows where an
ordinary strain of Southport Red Globe
will not mature, and where an Onion has to
hustle if it matures and makes a good sized
bulb. Is like Southport Red Globe, but ear¬
er. A good globe shape, dark red, ripens
quickly, small neck, free from scalding.

Mountain Red Globe

SPECIAL OFFER—Items marked "not postpaid" will be prepaid on orders for $10.00 or more of Garden Seeds.
The business end of Seed House No. 2, where your orders for Seeds and Bulbs are filled. You are always welcome here, of course.

**PEANUTS**

Of course, we folks up north can't compete with the South in growing peanuts, but we can attempt to grow a few for your own use. Just as easy to grow as corn will ripen. This variety is used for salted Peanuts.

260—Early Northern. Most every pod contains three nuts and this is very unusual in any variety. It is larger than Early Northern.

261—Tennessee Red. Most every pod contains three nuts and this is very unusual in any variety. It is larger than Early Northern.

151—Laxtonian is the shortest Pea we have and has a pod as large as the largest. The quality is fine and the yield well.

152—Little Marvel. It is an early dwarf, wrinkled Pea, will largely take the place of Excelsior, Premium Gem, and varieties a few months later than Laxtonian. Strong pods and an excellent quality. The vines are simply loaded. The pods are medium size and filled full of Peas. They are tender and sweet. Use this variety when you have new potatoes and creamed peas.

153—Premium or Little Gem. Both Premium or Little Gem and Excelsior will soon be replaced by Little Marvel, which is much better in all respects.

157—Stratagem is an old reliable, large-podded variety of very high quality. Has a dwarf vine and thus the principal difference between it and Alderman.

158—Bliss Everbearing. A good main crop, wrinkled variety. Yields well.

**PARSNIPS**

Don't make hard work out of growing a crop of Parsnips. The seed is slow to sprout, but if you will plant them early and sprout will have no trouble in getting a stand.

20—Early Northern. Can be depended upon for a crop in any ordinary season in any soil where corn will ripen. This variety is used for salted Peanuts.

205—Hollow Crown or Long Smooth. The standard sort. Long, smooth, tender and sweet.

206—Improved Half Long. Much like the above, but shorter and heavier. Fine quality.

147—Field's Little Marvel. This Pea can be cooked, pods, peas and all, just like string beans.

152—Little Marvel. High quality, large pods.

**ENGLISH PEAS**

The English are great people for Peas, and we have imported and tried out a number of new varieties. A few, we have selected three that will cover the season from early to late. They are all heavy, heavy podded, dwarf Peas, very fine in quality, and under favorable conditions are great yielders.

147—English. Second Early. Very heavy podded, large pods, wrinkled Pea. Used in English Main Crop.

PEPPERS

639—Early Sweet Pimento
Much earlier than other sorts and will produce an abundant crop; while the southern Pimentos, as a rule, get too bearing only a short time before frost and does not have time to produce much fruit. Sweet and mild, rounding flat in shape, medium size; flesh thick, red when ripe, and never hot or bitter.

641—World Beater
A large, mild, sweet and tender and of the best quality. I think it will take the place of Chinese Giant entirely, as it is practically as large and much earlier and more prolific.

642—Golden Queen
Large glossy golden yellow.

644—Spanish Pimento
Medium size; flesh thick, i'd inches long and often a hundred or more to the single bush.

645—RUBY KING
An old standby. Medium sized, sweet and tender and medium early.

646—Sweet Neapolitan
Early and very prolific. Shaped like the World Beater or Ruby King, but smaller.

648—Golden Jan Hulless
Just like Japanese Hulless in appearance and size, but a golden yellow instead of white. Pops out a creamy white. Has a most delicious flavor, very tender and crisp and no hulls.

650—Big Tom
A large, mild, sweet and tender and of the best quality. I think it will take the place of Chinese Giant entirely, as it is practically as large and much earlier and more prolific.

651—Golden Jan Hulless
Just like Japanese Hulless in appearance and size, but a golden yellow instead of white. Pops out a creamy white. Has a most delicious flavor, very tender and crisp and no hulls.

652—Big Tom Pumpkin
As the coarse "Mam¬moth Pumpkins," but the biggest and shiniest of all true Pumpkins. Both skin and flesh are of a deep orange yellow.

653—Buff Pie Pumpkins
The true flattened type, clear buff color, uniform size, and with thick, close-grained flesh.

655—Exhibition Collection of Squashes and Pumpkins
Enormous Squashes and Pumpkins, something big for exhibition purposes.

663—Winter Luxury
Small, medium size variety; fine for table and a good keeper.

Frost Proof CABBAGE PLANTS
Grown in the far South. Seed is planted in the fall, makes quite a growth before winter sets in, then cold weather and frosts hold them dormant. When spring comes they are tough and furry and will stand our early spring frosts and unfavorable weather without a setback.

No order for less than 100 plants filled. If this is more than you need, do your neighbor a favor by clubbing with him.

SPECIAL OFFER—items marked “not postpaid” will be prepaid on orders for $10.00 or more of Garden Seeds.
RADISHES

432—All Seasons Mixtures. A mixture that includes about everything, both early and late, little radishes, long ones, half long, and all Radish colors. Just the same as Early Scarlet Globe. Do not do well planted in late turnips are, during late July.

437—Crimson Giant. An early red Radish. tasting much like the old Early Scarlet Globe, but more pink in shape and color and much larger. Early, keeps on growing and remains tender, solid, and sweet.

441—Early Bird. An early, round bright red, the same as Early Scarlet Globe.

449—Early Round Dark Red. The name is a very good description of it except that no idea of quality is given, and it is one of the best in all respects.

451—Long Scarlet. It is quite early for a large variety. Long, slender, dark red and very tender.

452—Strawberry. Large white, for summer use.

453—Round White. About a round as the round red varieties.

456—S. A. X. I. Think, without any question, that this is the earliest Radish I have ever seen. A brilliant scarlet, perfectly round, small tap root and small top. It is crisp, you should have some of these for first early.

441—Scarlet Turnip White Tip. A very attractive, little, early Radish. While not extremely tender, it is the earliest and a mighty fine variety.

448—White Icicle. One of the best, if not the best early Radish. It is of medium length, small tap, very crisp and sweet. Not should not be confused with the Lady Finger—a larger and later white Radish. To give you an idea of its popularity, we sell more of this variety than an any other. It is very attractive, being a pure snowy white.

298.—Mammoth Sandwich Island. Salsify is one of the most delicious and nutritious of vegetables, and is cultivated for use in Winter when the supply of really good vegetables is so limited. It has the really true savory flavor. Average fully double the size of Old Long White. The roots are white and smooth and notwithstanding their large size, are of very superior quality.

736—Banana Squash. A new variety, but is the same as the other, although it is larger. It has a tough skin, but not hard like the Hubbard. 738—Boston Marrow, or as it is called, the Grand Marrow. It is the same shape and size as the Hubbard, but is soft shelled, and is not so good a keeper. It is not so good a quality as the Hubbard but is much earlier and more profitable.

SPECIAL OFFER—Items marked “not postpaid” will be prepaid on orders for $10.00 or more of Garden Seeds.
SPECIAL OFFER—Items marked “not postpaid” will be prepaid on orders for $10.00 or more of Garden Seeds.
WATERMELONS

Saw. Everyone knows what the Kleckley is, so picture in your mind the finest strain of this variety you ever saw, and you will have a good idea of the stock we are offering. Produces lots of large melons 40 pounds or more in size.

706—Colorado Kleckley Sweet. The finest stock of Kleckley sweet I ever saw, and of good quality. For early or late.

810—White Globe. A late, round, red flesh of good quality. Skin a mottled green. Has the toughest rind I ever saw, and a fairly thin rind, too.

719—Excel. A big, oblong Melon of good quality that is exceedingly valuable as a net variety, because of its size and attractive appearance. A better shiper than Kleckley Sweet.

721—Giant Kleckley. Something like Kleckley Sweet. Flesh is red, crisp, and sweet. A better shiper than Kleckley Sweet.

705—McVoy's Wonderful Sugar. It looks like the old Rattlesnake, but is of much better quality. Large, long and medium early.

705—Kleckley Sweet. This is the original strain and is probably the best known of any variety.

717—Princess. I don't know of any variety, because of its size and attractive appearance. A long, light green Melon; firm red flesh of good quality. Large, long and medium early.

707—Golden Honey. There are very few good yellow-fleshed varieties; however, you will find the quality in this one all right.

718—Irish Gray. This variety and the Excel are giving some of the other market varieties a close run for their popularity. A long, light green Melon; firm red flesh of good quality.

723—Volga, or Winter. A long, slender Melon having the Kleckley Sweet flavoring dill pickles. Pkt., 4c; oz., 7c; lb., 25c, 5 lb., 50c.

711—Cole's Early. Unusual good growth conditions the quality will be fair.

712—Florida Favorite is a slender, medium sized Melon, medium early, light striped and red flesh.

715—Ice Cream or Peerless. Medium early, fair size, good quality and red flesh. Solid green skin, close, small seeds, and some slight blunting of the round.

703—Halbert Honey. A long, slender Melon having the Kleckley Sweet flavor. Pkt., 4c; oz., 7c; lb., 25c.

806—Silky Top Strap Leaf. Large, sweet and fine grained. Has smooth leaves like cabbage. Purple top with yellow flesh. Not much of a success here in Iowa, but in the Northern states they are quite valuable.

805—Extra Early Milan. For early use this is the best; tender sweet, and very early. Looks like the old Purple Top Strap Leaf, but smaller and earlier.

801—Early White Milan. No difference in this and Extra Early Milan except in color. Larg-e, fine grained, good quality, and, on account of its shape, yields better than the old flat type.

808—Purple Top Strap Leaf. Large, sweet and fine grained. Has smooth leaves like cabbage. Purple top with yellow flesh. Not much of a success here in Iowa, but in the Northern states they are quite valuable.

807—Purple Top Globe. For main crop this and Extra Early Milan except in color.

804—Early White Milan. In late white variety.

803—Snowball. A fine globe-shaped, white Turnip, and of good quality. Good for early or late.
**FIELDS FLOWER SEEDS**

PLEASE ORDER BY NUMBER

---

1001—ALYSSUM, Sweet. Sweet Alyssum is the indispensable annual. Pkt., 1c.
1002—ACROCLINIUM, Everlasting. Pkt., 1c.
1003—AGERATINUM, Blue Perfection. A charming annual, entirely covered with a solid fluff of bloom until very late Fall. Pkt., 1c.
1004—SUNRISE or Molten Fire. A gorgeous new variety of medium height with foliage banded with bronze, scarlet and yellow. Pkt., 1c.
1005—TROCHER or Joseph’s Giant. Pkt., 1c.
1006—CANDATUS or LOVE-LIES-BLEEDING. Pkt., 1c.
1007—ANTHURIUM or SNAPODORON. Their beautiful colors and fragrance are wonderfully pleasing.
1008—FIREWORT. Pkt., 1c.
1009—QUEEN of the Annual Flowers
   One of the best flowers we have for cutting and for bedding. They look well either in borders or near foundations of the house. Colors are bright and attractive. All full double; no yellow centers. American Branching. These you must have for your main crop. Give them plenty of room, as they have long stems and gorgeous big blooms.

---

1010—PERFECT. Pink. 1011—Azure Blue. 1015—PERFECTION. White.
1012—PERFECTION. White. 1016—Purple. 1017—Mixed. All colors.
1013—LAVENDER. 1017—Mixed. All colors.
1022—LAVENDER GEM. Exquisite lavender. Combined beautifully with marigolds. Pkt., 1c.
1023—PEACH BLOSSOM. Pale pink blossom shade. Combined with Ageratum or Gila.
1024—HEART OF FRANCE. Pure red. Flowers are large. Plants of the branching habit and stems long. Pkt., 1c.
1025—PEACH BLOSSOM. Pale pink blossom shade. Combined with Ageratum or Gila. Pkt., 1c.
1026—LAUREL ORANGE. Pkt., 1c.
1027—Flowers all colors. Covered with white polka dots. Pkt., 1c.
1028—Giant Branching. Same as American Branching but larger. Pkt., 1c.
1030—American Branching. These you must have for your main crop. Give them plenty of room, as they have long stems and gorgeous big blooms.

---

1040—Orange Yellow. 1041—Lavender. 1042—Pink. 1043—Yellow flowers. Pkt., 1c.
1044—Callistephus. Single and double. Pkt., 1c.

1050—Mixed. Pkt., 1c.
1051—Lemon Queen. Pkt., 1c.
1056—COBAKOS. A new dwarf form of the above. Mixed. Pkt., 1c.
1060—Florists’ Pink Mixed.
1061—Florists’ Red Mixed.
1062—Giant Hyacinth-Flowered. Pkt., 1c.
1063—Finest Mixed. Pkt., 1c.
1064—CANNA SEED. File a hole in each seed before planting. Pkt., 1c.
1065—CARDINAL. Red. 1066—CARMA SEED. Pkt., 1c.
1067—CONEFLOWER. Pale yellow. Pkt., 1c.
1068—CHINESSE WOOLFLOWER. Pkt., 1c.
1069—CANDYTUFT. Lavender, rose and carmine shades. They have a cluster of flowers somewhat resembling annual phlox. Pkt., 1c.
1070—CARDINAL CLIMBER. Leaves and bloom like Cypress Vine, but larger. Pkt., 1c.
1071—CHINSESE WOOLFLOWER. Pkt., 1c.
1072—CHINESE WOOLFLOWER. Pkt., 1c.
1073—CHINESE WOOLFLOWER. Pkt., 1c.
1074—DOUBLE CORNFLOWER (Centaurea cyanus). Much superior to the old-fashioned single Cornflower. Pkt., 1c.
1075—DYMOS. The glory of the Fall garden. On tall, feathery, green stalks it bears daisy-like flowers in all shades of lavender, pink and red. Our strain blooms all summer.

---

**BALSAM or TOUCH-ME-NOT.** The many colored flowers grow along the stem, intermingled with the foliage, making a most attractive plant.
1037—Priced Double Mixed. The finest. All double. Pkt., 1c.
1039—HILL LACE FLOWER. Long-stemmed flowers and a constant bloomer. Pkt., 1c.
1040—CARNATION, Dwarf Marguerite. A half-hardy plant, blooming late in the season. Fragrant, double; colors white and various shades of pink. Sometimes called “Carnation Pinks.” Pkt., 1c.
1042—CALENDULA, Yellow and orange. Early Summer to frost.
1043—YELLOW. Pkt., 1c.
1044—Mixed. Pkt., 1c.

---

**FLOPST’S MIXTURE.** Contains principal types.
1050—Florists’ White Mixed.
1051—Florists’ Pink Mixed.
1052—Florists’ Red Mixed.
1053—Florists’ Mixture.

---

**SINGLE EARLY COSMOS**

1075—SINGLE EARLY COSMOS. A beautiful vine with bell-like flowers. Pkt., 1c.
1076—DOUBLE CORNFLOWER (Centaurea cyanus). Much superior to the old-fashioned single Cornflower. Pkt., 1c.
1077—Blue. Pkt., 1c.
1078—White. Pkt., 1c.
1079—Lavender. Pkt., 1c.

---

**FIVE O’CLOCK.** The glory of the Fall garden. On tall, feathery, green stalks it bears daisy-like flowers in all shades of lavender, pink and red. Our strain blooms all summer.

---

Special Mild Cure—Delicious Taste—Our HAMS and BACON!

Varieties at $10.00 per dozen, 6 for $55c, 3 for $40c, postpaid

Seed Corn Treated with BAYER DUST—Means More BUSHELS!
1861—Five-Foot Bed. 15 plants as follows: 4 tall for center or background, and 9 medium height for outside of a formal bed or for front of a border, $1.25.

1862—Seven-Foot Bed. 15 plants as follows: 1 tall for center or background, 8 medium for second circle, and 6 for outside of bed or for front of a border, $1.75.

1865—Ten-Foot Bed. 37 plants as follows: 1 extra tall for center, 6 medium height for second circle, 12 for next circle, 18 shorter for outside circle, $3.50.

1841—CHOICE MIXED CANNAS

Odds and ends, small lots of a kind, stray plants that get mixed in with other varieties, we put all together in a mixture. They are all first class named varieties, but I cannot promise you any particular color or variety. 6 for 50c; 90c per dozen; $1.50 per 100, postpaid.

CANABorder

Use as a background for lower growing flowers; or as a screen to hide some unsightly place, a chicken yard, an old fence, or spot at the side or back side of the lawn. Colors well blended.

1861—Canna Collection. Enough for a double twenty-five foot row, plants two feet apart each way. They are all of four varieties, your choice, $2.25, postpaid.

NAMED CANNAS

All varieties, 15c each; 6 for 75c; $1.25 per dozen.

1814—Telmania. Five feet. Green foliage. Flowers a delightful orange streaked and dotted with red.

1840—Yellow King Humbert. Five feet. Green foliage. Large golden yellow flowers, dotted and blotched with bright red.

1836—Canna Border. Enough for a double twenty-five foot row, plants two feet apart each way. Colors well blended.

1890—Maurice Kevoine (Collarette). Rich, velvety dark crimson; collar petals white; open center. Each, 50c; 6 for $1.50; 12 for $2.25.

1893—Jack Rose (Decorative). Crimson-red violet-rose. Each, 20c; 6 for $1.10; 12 for $2.00.

1878—Brunhilde (Cactus). Finely formed flower of rich plum color. Free bloomer. 2c each; 6 for $1.10; 12 for $2.00.

1860—Dr. Tyrell (Decorative). A peculiar bronze color, difficult to describe. 30c each; 6 for $1.10; 12 for $2.00.

1888—The Eagle (Hybrid Cactus). Large fluffy flower of soft sulphur yellow with long, stiff stems. Each 50c; 6 for $1.75; 12 for $3.00.

1885—Thoral Park Jewell (Show). Deep violet rose. Each, 25c; 6 for $1.10; 12 for $2.00.

1891—Margarette (Pompon). Deep line of fine, compact form, good long stems. Each, 50c; 6 for $1.60; 12 for $3.00.

1882—Peter Pan (Anemone flowered). High yellow center surrounded with double row of blood red "swallow-tailed" petals. Each, 50c; 6 for $1.75; 12 for $4.00.

1888—Arabella (Show). Pale primrose yellow, suffused with pink. 20c each; 6 for $1.10; 12 for $2.00.

1889—Beeche Blue (Show). The nearest blue of any dahlia. 30c each; 6 for $1.50; 12 for $2.00.

1895—Queen Victoria (Show). Clear, bright yellow. Each, 20c; 6 for $1.10; 12 for $2.00.

1872—Queen Esther (Peony flowered). A delicate shade of rose pink with a shen of gold. Each, 50c; 6 for $1.75; 12 for $3.50.

1876—Tillamook (Show). Large ball-shaped blossoms, composed of tightly quilled petals of clear rose pink. Each, 50c; 6 for $1.25; 12 for $2.50.

1888—White Swan (Decorative). Pure white. Each, 20c; 6 for $1.10; 12 for $2.00.

1907—COLOR COLLECTION

For those who like dahlias under name "show," a very formal flower; the "decorative" or less formal and large; the "cactus" with slender pointed petals and the "pompon" or a diminutive type from other varieties. Price, postpaid; 6 for 90c; 12 for $1.00.

TUBEROUS-ROOTED BEGONIAS

A flower specially suited to shady places in the border or on the north side of a building, in porch or window boxes, or makes a good pot plant to be grown indoors.

Flowers on a well developed plant from three to even five flowers on a single stem. The colors range through red, orange, salmon, rose and white. Price, postpaid: 6 for 35c; $1.95 per dozen.

1819—Large Bulbs. Single and double mixed. 2 for 45c; 5 for 60c; 6 for $1.00.

1859—Small Bulbs. Single and double mixed. 2 for 30c; 5 for 50c; 7 for $1.00.

1816—CALLA, GOLDEN YELLOW (Elliotianna)

A beautiful new Calla for outdoor culture and pot culture for early Spring bloom. Flowers are large, clear golden yellow. Leaves are large, round, and pretty plant. Large Bulbs, 1c each or 5 for $1.00; Small Bulbs, 2 for 40c; 5 for 75c; 7 for $1.00.

1811—MEXICAN TUBEROS

Strong, sturdy spike, pure white, very fragrant flowers. Can be used as cut flower or allowed to stand in the garden. Large Bulbs 3c each; 5c per dozen; $3.75 per 100.

1812—GIANT HYBRID AMARYLLIS

A very large flower, red or pink, and shaped like a lily. Six to 12 blooms to a single bulb. 7c each; 5 for $2.00.

1845—MADERIA VINE

One of the finest climbers for foliage effect. Sometimes called Mimoneeta Vine. Dense branching growth, has glossy green leaves, and small, feathery, white blossoms; very fragrant. Rapid grower, fine for porches, arbors or anywhere where a quick growing vine is desirable. 6 bulbs for 25c; 12 for 50c; 50c per 100.

1818—CALAMUS OR ELEPHANT'S EAR

These plants do not bloom, but are valued for the appearance of their enormous leaves. They often grow 3 feet in length, and make a fine background for smaller plants and flowers. 3c each; 2 for 35c; $1.50 per dozen.

Goes Farther, Looks Better, Lasts Longer—Our PAINT!
Yes, we have hung corn in any variety you want for $4.00 a bushel. A price taken for pure hard seed, and ready for planting and waiting for an early seed corn.

Last fall I told the boys to get busy and hang up a lot of seed. The corn crop here was of extra good quality—the best I have seen in ten years. We began hanging the 26th of September and finished the 10th of October.

I have sold a lot seed corn in my time, but never have I seen as beautiful a lot of hight bred, hardy, yellow-dent, dry-feeding, dry stalk, strong germinating seed as this. Only $4.00 a bushel in any amount. Either ear corn or shelled and triple graded. Of course, it’s sold subject to your own test and approval. Add 50¢ per bushel and we will prepare freight in Zones 2 and 3.

STANDARD CORN BELT VARIETIES

| YELLOW | | |
|--------|--------|
| FIELD’S UTILITY YELLOW—See next page. | | |
| NEBRASKA CATTLE CORN—Good corn for both thin land and good land. Slim ears with white kernels. Matures in 105 days. | | |
| IMPROVED SHENANDOAH—An improvement over the big, rough type. Fine grade and ripens here in about 105 days. | | |
| IMPROVED SHENANDOAH SPECIAL—Similar, but smoother. Matures here in 105 days. | | |
| REDGOLD YELLOW—Popular smooth strain of Reid’s which has made a very good showing in the Iowa yield contests. Matures in 105 days. | | |
| ROUGH REID’S YELLOW DENT—Large, yellow, fairly rough, extra fine, shown by a lot in the yield contests. Matures here in about 110 days. | | |
| SMOOTHER REID’S YELLOW DENT—Similar, but smoother and about 10 days earlier. | | |
| WHITE | | |
| IOWA SILVERMINE—Medium size white. Good for old or thin land. Stands dry weather well and makes a crop where others fail. Matures in 105 days. | | |
| BOONE COUNTY WHITE—Deep grained, fairly rough, large ear. For strong land. Matures in about 115 days here. | | |
| CORNPLANTER—Similar to Boone, larger, rougher and showier. Finest looking of all white corn. Matures in about 115 days here. | | |
| WHITE ELEPHANT—Long, smooth, white, heavy yielder, stands hardship well. Matures here in about 110 days. | | |
| ST. CHARLES WHITE—Red cob, white corn, strong grower, good yielder, heavy foliage—fine for fodder. Matures here in about 115 days. | | |

EARLY 30 TO 90 DAY CORN

We have both Dakota grown and local grown in these varieties. They are the best varieties for main crops north of Sioux City and are used here for replanting, early feed and hogging down. NORTHEAST YELLOW DENT—Without question one of the highest yielding and best quality early yellow corns on the market. Matures here in 90 days and is just the thing for main crop in Northern Iowa, Southern Minnesota and southern South Dakota or anywhere an early corn is needed.

PRIDE OF THE NORTH—Similar, but about 10 days earlier. Earliest of all yellow Dents. Use in extreme northern or where altitude is very high.

SILVER KING—Similar to Silvermine, but smaller and about 15 days earlier. Popular for main crop in Northern Iowa, Southern Minnesota and southern South Dakota or anywhere an early corn is needed.

PRICES SEED CORN (Not Hung)

These prices are for strictly first-class seed, extra selected, either in the ear or butted and tipped, shelled and triple graded. Tested before shipping and tested marked each sack. Prices are for 100 bushels, except for new sacks without extra charge for sacks. We pay the freight in zones 2 and 3.

Get Back to Prosperity—Plant a GOOD BIG GARDEN!
**Fields' Utility Yellow**

_out yields standard varieties and always matures $4. bushel*

Three years ago I heard about a special strain of corn developed by an Illinois man cooperating with the U. S. Department of Agriculture. I got some and gave part of it to a County Agent to try out along with his local strains and also some of our best seed.

The results were almost unbelievable. It not only outyielded by several bushels (some as high as 20 bushels) practically every other variety—richies—but was dry, sound and remarkably free from mold and damaged corn. No ear rot to speak of, almost no down stalks, yet a sort of corn that ripened earlier, yielded better and stood out exceptionally well.

I am going to call it Field's Utility Yellow. It's not a show corn. Fact is, if you want the best yielding corn and the kind that will get ripe every year, get just as far away from show type as you can.

The State Colleges and the U. S. Department of Agriculture have been preaching smoother corn and smaller corn for some time but I wasn't satisfied that the smoother corn would yield with the big stuff. In a lot of cases it won't, but this corn will, and you can prove it for yourself.

The ears are remarkably uniform in size. Not so large around as most Reid's Yellow Dent, but fully as long. Has a smoother topped kernel than Reid's, reasonably deep, and rich in oil which means a good feeding grain. Not so showy as Reid's, but will under all corn belt conditions out-yield Reid's. Besides that, it always matures earlier, is of better quality, shells out better and will feed farther into the fall for fodder and ensilage and is excellent for ensilage and for cattle, fodder and ensilage and is excellent for ensilage and is such a good feeding corn that ripened earlier, yielded better and shelled more uniformly than Reid's.

Don't be afraid to use them in the fall as a fodder corn as a feeding corn, and as a standard variety of corn provided that it is not grown for the early market and is not grown for market. It will make a very good corn for ensilage and for cattle, fodder and ensilage and is excellent for ensilage and is such a good feeding corn that ripened earlier, yielded better and shelled more uniformly than Reid's.

If you don't want to grow the extra fine early market and are not interested in ensilage, try it in the fall as a fodder corn as a feeding corn, and as a standard variety of corn provided that it is not grown for the early market and is not grown for market. It will make a very good corn for ensilage and for cattle, fodder and ensilage and is excellent for ensilage and is such a good feeding corn that ripened earlier, yielded better and shelled more uniformly than Reid's.

Northern Grown Seed Potatoes

We can furnish you with very fine stocks of Northern Grown Seed Potatoes. Right now it is rather early to quote prices, but write in later on and we will be glad to send price list. Early Ohio and Irish Cobbler are extra fine varieties for general purposes, and you will find them satisfactory in every way.

DIPDUST POTATO TREATMENT

A very successful treatment for white or sweet potatoes. Controls blackleg, seed decay, scab, etc. and 1 lb. is enough for one acre. Dissolve 1 lb. in 2½ gallons of water. Put the seed potatoes in a wire basket or some container with holes in the bottom and pour the solution over them, catching it in a tub to use again. Price is $1.75 per 1-lb. can, to go express, prepaid.

Does Your Soil Need Lime?

The motto of the up-to-date farmer has become "lime, legumes and inoculation." Alfalfa, sweet clover and red clover all need lime and most crops do better with it. The Soiltest pocket-size soil testing outfit with color chart and lime table is a simple test and anyone can test his own soil with it. Complete outfit for $1.00, prepaid.
Spring time will soon be here, and that, of course, means seeding time. We are urging you to buy your field seeds early so that they will have time to reach you by freight, and you will also have time to test them thoroughly before planting. We are proud to say that through our fair dealings with our customers, we are now rated as the largest mail order seed company in the United States, and that means the world.

The larger the seed house, the greater its capacity for acquiring in large quantities the many varieties of seed adaptable for each and every locality where seeds are used.

Our staff takes you to best for corn belt conditions. The fact is, we have learned to depend upon Kansas-Nebraska seed and seed from the Dakotas, anywhere in the United States. Use from 15 to 20 pounds of seed per acre.

Field Seed Department

My ideas on buying Field Seed

I have been preaching alfalfa to you farmers for the past 25 years, and I am going to continue preaching about this great legume until it is found on every farm, because it is the connecting link between bigger and better crops and more and better livestock. It excels all other hay crops in yield per acre, feeding value, drought resistance, soil enrichment and weed eradication. It is becoming necessary these days for the livestock farmers to grow chiefly crops that work hardest for them—those crops that produce the most and bring the greatest net returns for labor and effort applied. Here in the Corn-Belt section are two crops which stand foremost in the production of feed per acre for livestock. Corn and Alfalfa; corn for silage, alfalfa for hay.

Varieties of Alfalfa

Grimm. This is a very hardy, time-tried variety. It has been tested thoroughly throughout the United States, Canada, and a good many foreign countries. It has the characteristic of a spreading, branching root system, large spreading crowns and the underground buds by which a thin stand will be thickened up. If you have hardpan subsoil to contend with or a high water level, use this type of Alfalfa. It is one variety that will grow where other varieties fail. Our Grimm seed all comes from registered and pedigreed fields, and we can furnish affidavits to that effect, so you are assured of getting genuine hardy Grimm. Use from 10 to 12 pounds of seed per acre.

Northwestern Hardy. Northwestern grown Hardy alfalfa is a variety which is grown in the Dakotas, Montana and Utah and those states in which it takes an extra hardy alfalfa to withstand the extra cold, cold winters, as well as the drier summers. To those who demand a hardy field of alfalfa, and who do not wish to pay the higher prices for Grimm and Cossack, by all means use Northwestern Hardy Alfalfa. Our trade is rapidly turning to this variety of alfalfa. Use from 15 to 20 pounds of seed per acre.

Cossack. The Government spent thousands of dollars for a comparatively few pounds of Cossack seed, and went to great pains to secure absolutely the hardest Alfalfa in the world. Prof. Hansen, now of South Dakota, secured this seed for the Government and brought it to this country where it was carefully propagated and reproduced, until today there is a fairly plentiful supply. It has the same underground root system as Grimm, spreading crowns. In fact, it looks very much like Grimm. The seed we have to offer you is genuine, coming from registered fields, and we furnish an affidavit to this effect if you want it. Use from 15 to 12 pounds per acre.

Mid-West (Kansas-Nebraska). From Nebraska and Kansas we obtain a high grade of seed that is hard to beat for corn belt conditions. The fact is, we have learned to depend upon Kansas-Nebraska seed and seed from the Dakotas, anywhere in the United States. Use 15 to 20 pounds of seed per acre.
ABOUT
CLOVER SEED
PRICES

We Do Not Handle Any
Foreign Seed

Buy your Clover seed early, for the Clover seed situation follows the same as last year. At the time this book went to press, prices on first grade Red Clover were in a very unsettled condition. If you want to make sure of getting the very lowest price, write for the latest prices and samples when you are ready to buy.

We handle only fancy grade home-grown Red Clover seed, and any quotations you may receive from us, whether specified or not, are based on very highest quality.

INSIST ON TESTED SEED

Our Red Clover is all domestic grown and we do not handle any foreign Clover at all. Keep this in mind, in buying Red Clover, insist on seed grown in this country, as foreign Clovers are very unsatisfactory. All our Red Clover has been thoroughly reclaimed and sold subject to government test. I advise you most strongly to buy only that grade of seed.

MEDIUM RED CLOVER

This is the most popular of the Clover family. Under conditions where Red Clover succeeds, it is the best general purpose Clover. It is commonly called Red Clover or June Clover, and is the variety grown all over the United States. Makes fine pasture for growing stock, and an excellent hay very high in protein. It grows to perfection here in Iowa, and the price here is the best in the world. Use from 12 lbs. of seed per acre. See monthly price list.

GRENDBY COUNTY SWEET CLOVER

(Early White)

An early type of the regular white blend. In habit of growth, it resembles the Yellow, and is about three weeks earlier than the White. It doesn't rot so big as the ordinary White, grows only about 4 feet high.

OTHER GRASS SEED

For river bottom land, subject to overflow, make a mixture of Red Top, Alsike and Blue Grass.

GIANT WHITE ANNUAL HUBAM

A biennial, that is, it lives two years and then dies. Blooms except that it is an annual and makes its entire growth and seed the first season. Fine hay or pasture proposition, and an excellent bee pasture. Use 12 lbs. of seed per acre.

MAMMOTH RED CLOVER

A larger, later variety of Clover, somewhat resembling the Red or June Clover. Also known as Sapling Clover, Pat Vine Clover and Bull Clover. Is about two weeks later in maturing than the Common Red. Use from 7 to 12 lbs. of seed per acre. See monthly price list.

ALSIKE CLOVER (Swedish Clover)

Looks like a hybrid between Red and White Clover. Bloom somewhat like White Clover, but more pink in color, specially suited to low, wet land, where Red Clover will not thrive. Use 4 to 8 lbs. per acre. See monthly price list.

WHITE DUTCH CLOVER

This is the low, creeping Clover that is used so much on low and in lowland pastures. It is the hardest of Clovers. Use 5 lbs. of seed per acre. See monthly price list.

SWEET CLOVER

The greatest of all legumes as a soil improving proposition. Fine to use as catch crop between wheat and corn. Sow with wheat or oats in the Spring, pasture in the Fall and play under the next Spring for corn. When plowed under about the first of May, you will return fertility to your soil equal to 20 tons of barn-yard manure. Makes a fine pasture or hay crop, equal in feeding value to alfalfa. Is an excellent bee pasture and will grow where other Clovers and Alfalfa will not. Does best when seeded early in the Spring, like Red Clover, and the earlier you sow the better. Sweet Clover is a by nature a cheater, for if left alone it will make thin land of yours back quicker than anything you can grow. Be sure to use bulked and scarified seed.

WHITE SWEET CLOVER (Melilotus Alba)

A biennial, that is, it lives two years and then dies. Blooms and makes the seed the second season. Hardy everywhere. Will make hay from the first year and an excellent pasture equal to alfalfa. It is an excellent bee pasture. Use 12 lbs. of seed per acre.

OTHER GRASS SEED

LAWN GRASS SEED. Of course, you want a nice green lawn, which is as important thing in making land richer.
CANADIAN FIELD PEAS

Variety of Peas grown in the North and Northwest as a field crop similar to the vegetable garden Pea, but make longer vines and more pods. Should be sown very early in the spring. A splendid combination is to use 1½ bushels Canadian Field Peas and 1½ bushels oats per acre. Don't sow these Peas into season, as they grow only in cool weather. See price list. Soy Beans can be used for a soil feeding, or feed, cured for hay or cut for a seed crop. Will grow on sour land, and equal in feeding value to alfalfa. Planting beans in the corn to be hogged down is a very desirable practice. We have tried hundreds of different varieties and have finally sifted down to the ones listed below. Free bulletin on Soy Beans will be sent on request.

ITO-SAN
The earliest we list, maturing in 100 days; attains a height of 28 inches; a yellow bean, and fine for northern latitudes.

MID WEST
Standard for the Corn Belt. Suited for hay or pasture, as a seed crop or for haying down. Grows 3 ft. high, matures in 120 days. Seeded yellow.

PEKIN
A black-seeded variety; one of the very best for hay or ensilage. Grows 5 ft. high, matures in 115 days.

SUDAN GRASS
The popular new hay and pasture plant. This is undoubtedly the greatest new crop since the introduction of alfalfa, and it will make more hay or fodder of a better quality and with more absolute certainty of a crop than anything else, except alfalfa. It has the advantage over alfalfa of being quick and easy to get. It is certainly the "poor man's friend."

It does best on well drained, rich to sandy loams, but as much as it sends out an extensive root system, does very well on the thinnest soil and will make good in a dry season when everything else fails. Will feed a team and even a cattle herd. It is usually figure as a pasture proposition, that Sudan will carry five thousand pounds of live weight all summer long. Firefly, it is an annual plant, similar to Cone or Kaffir, but much more slender and fine-stemmed, easier to cure, quicker to mature, and makes a greater yield of better quality. Sudan stools like wheat and can be cut once a month. Best to cure green and curried in shocks. It is also fine to feed green as a silage crop, or to put in a silo, it does not sour like cane. The greatest advantage of Sudan over other crops is in its ability to withstand adverse weather, and make a crop every year in spite of the dry weather and hot winds.

It is very important to get seed free from Johnson grass, Cone and Kaffir hybrids. For prices, see field seed price list.

WHITE KAFFIR-BLACK HULL
This is the standard grain sorghum grown all over the Midwest. It is worth growing anywhere, however, as it makes a big yield in spite of any kind of weather. The grain makes fine feed for poultry and pigs and the fodder is greatly relished by horses and cattle. Prices vary; see field seed price list.

FODDER CANE-SORGHUM
Most of the farmers of the West are getting well paid on the value and use of cane. H. F., in condensed form, are the seeds resembling Cane. Produces from three to eight tons (cured) per acre of valuable fodder for horses and cattle; may be grown anywhere; can be used for feed from June to frost; is excellent for poultry and will increase egg production. Use from 75 to 100 pounds of seed per acre.

Other Field Seeds
Due to a lack of space in our catalog, it is impossible for us to take up many items in full description. We also have Mixed Hardy Alfalfa, Utah Alfalfa, English Blue Grass, Bermuda Inermis, Bermuda Grass, Fescue, Ryegrass, Creeping Bent Grass, other grasses, potatoes, peas, beans, flowers, Sugarbeets, Winter or Hairy Vetch, Red Winter Wheat, Rye, Barley, Buckwheat, Marquis Spring Wheat, Oats and Pulverized Sheep Manure, which are very good. Ask for our free bulletin on our field seed price list.
AUSTHEA (Rose of Sharon). Beautiful, upright and free growing with large showy flowers. Hardy in this latitude, but needs protection through winter anywhere north of here. Red, white or pink. Be sure and specify color.

ALMOND, Pink Flowering. Very showy bushes with small but very double pink flowers. 60c each or 2 for $1.00.

ALMOND, White Flowering. Same as the Pink except the flowers are pure white. 60c each or 2 for $1.00.

BARRBERRY, Thornberry. Glossy green foliage changing to coppery red in the fall. Covered with scarlet berries. The stems are covered with thorns.

BARRBERRY, Red Leafed. New introduction. Habit of growth like Barberry, but not so thorny except that it is deciduous. 60c each or 2 for $1.00.

DEUTZIA. Handsome Japanese shrub with attractive flowers in May or June. Deutzia, Gracilis, is the dwarf, growing about 6 inches high. Deutzia, Candidissima, medium height. Deutzia, Pride of Rochester, is tall, growing higher than most others. These have pure white flowers. Be sure and specify color.

DOUGWOOD, Red Barked. Grows 2 to 3 feet high. Valued for bright red color of branches. Attractive as the winter time.

DOUGWOOD, Yellow Barked. Same as the red except for the color of the bark, which is yellow. Better plant some of both kinds.

FORESTIA, Fortunei (Golden Bell). Early shrub to bloom. Covered with golden yellow, bell-shaped flowers before the leaves. FLOWERS, QUINCE (Japanese Quince). Flowers are bright red, borne in great profusion. 35c each; or 3 for $1.00, postpaid.

HONEYSCULKE, Morro, a thornless variety. Spreading than Tatarian Honeysuckle and much used for foundation plantings.

HONEYSCULKE, Tatarian. Old-fashioned if a honey suckle blooming in July and August. Covered with golden yellow flowers followed by red berries which hang on trees throughout the winter.

HYDRANGEA, Arborescens, (Ellis of Snowball) . A shrub like Snowballs, pure white, except larger. 60c each; 2 for $1.00, postpaid.

Hardy Ornamental Shrubs

Althea

ALTHEA (Rose of Sharon). Beautiful, upright and free growing with large showy flowers. Hardy in this latitude, but needs protection through winter anywhere north of here. Red, white or pink. Be sure and specify color.

AMMOND, Pink Flowering. Very showy bushes with small but very double pink flowers. 60c each or 2 for $1.00.

AMMOND, White Flowering. Same as the Pink except the flowers are pure white. 60c each or 2 for $1.00.

BARRBERRY, Thornberry. Glossy green foliage changing to coppery red in the fall. Covered with scarlet berries. The stems are covered with thorns.

BARRBERRY, Red Leafed. New introduction. Habit of growth like Barberry, but not so thorny except that it is deciduous. 60c each or 2 for $1.00.

DEUTZIA. Handsome Japanese shrub with attractive flowers in May or June. Deutzia, Gracilis, is the dwarf, growing about 6 inches high. Deutzia, Candidissima, medium height. Deutzia, Pride of Rochester, is tall, growing higher than most others. These have pure white flowers. Be sure and specify color.

DOUGWOOD, Red Barked. Grows 2 to 3 feet high. Valued for bright red color of branches. Attractive as the winter time.

DOUGWOOD, Yellow Barked. Same as the red except for the color of the bark, which is yellow. Better plant some of both kinds.

FORESTIA, Fortunei (Golden Bell). Early shrub to bloom. Covered with golden yellow, bell-shaped flowers before the leaves. FLOWERS, QUINCE (Japanese Quince). Flowers are bright red, borne in great profusion. 35c each; or 3 for $1.00, postpaid.

HONEYSCULKE, Morro, a thornless variety. Spreading than Tatarian Honeysuckle and much used for foundation plantings.

HONEYSCULKE, Tatarian. Old-fashioned if a honey suckle blooming in July and August. Covered with golden yellow flowers followed by red berries which hang on trees throughout the winter.

HYDRANGEA, Arborescens, (Ellis of Snowball) . A shrub like Snowballs, pure white, except larger. 60c each; 2 for $1.00, postpaid.
PEONIES

The flower for the millions and the millionaire. The millionaires have no difficulty and yet the millions can all have them. The percent given below, represents the very few and most outstanding varieties to be had, and they are all priced very reasonably.

In the following descriptive list, the figures following each name stand for the rating which each variety has been given by the National Society. A rating of 90 is considered perfect sort. A rating of 70 is considered very good, 60 is fair and 50 is poor.

WHITE PEONIES AND LIGHT SHADES

Albatre—(87). Mid-season, rose-type, cream white. $2.00

Ascarr—(58). Mid-season, rose-type, lilac pink. 50c each or 3 for $1.50

Asa Gray—(51). Mid-season, semi-rose type, white. 50c each or 3 for $1.50

Barones Schreiber—(50). Late, rose-type, high white. 50c each or 3 for $1.80

Caprice—(75). S. reddish mauve; F. a darker shade, veined with silvery white with center of golden stamens. 50c each or 3 for $1.25

IRIS

The figures in parenthesis right after the names in the descriptive price list refer to the rating given by the American Iris Society. In the description stand for "standards," which means the three petals which stand upright. F. stands for "falls," which means the three petals which curve downward. "Self" means that the flower is the same color all over. What is higher, the higher the rating, the more desirable the flower.

The figures in parenthesis right after the names in the descriptive price list refer to the rating given by the American Iris Society. In the description stand for "standards," which means the three petals which stand upright. F. stands for "falls," which means the three petals which curve downward. "Self" means that the flower is the same color all over. What is higher, the higher the rating, the more desirable the flower.
CLASSES OF ROSES. You will enjoy getting acquainted with the characteristics of the different classes of roses, such as Climbing, Hybrid Perpetual, Hybrid Tea, Floribunda, and Rugosas. You will find a brief description after each heading and the roses listed under each should be consulted accordingly.

CLIMBING ROSES. These produce a number of long branches, which may be trained to trellises or allowed to trail over banks. They have ceased to bloom, cut away all blooming wood just below the lowest flower cluster. Remove a few of the oldest canes at the ground each year, as they become wood.

GARDEN ROSES. The strongest shoots come from the base of the plant, and therefore they should be cut back to within two or three inches of the ground when planting. In October draw the earth about 6 inches high around the plant and after the ground freezes for the winter mulch with a foot of straw.

GARDEN BEAUTY. The Queen of crimson roses. Outstanding because of its eye catching beauty.

GARDEN BEAUTY. The Queen of crimson roses. Outstanding because of its eye catching beauty.

GARDEN BEAUTY. The Queen of crimson roses. Outstanding because of its eye catching beauty.

GARDEN BEAUTY. The Queen of crimson roses. Outstanding because of its eye catching beauty.
POLYANTHAS

or Baby Ramblers

The Baby Rambler Roses are the only hardy, low bedding plants that can be absolutely depended upon to bloom in constant bloom all summer. No pruning is needed except to keep the faded flowers and dead twigs removed. Catherine Zeimet. Pure, rose-white double in picture clusters. Foliage dark, glossy.

Clothilde Soupert. White, shading to deep pink center; medium size and very double with fragrant flowers.

Triomphe de Orleans. Brilliant cerise-red, lasting in color; blooms profusely; vigorous and erect with bright, glossy green foliage.

RUGOSA

or Shrub Roses

These have heavy, deep green foliage the summer through and abundance of bloom in early August.

Conrad F. Meyer. Pure silvery pink, fragrant and hardy.

Hansa. Double reddish-violet flowers of large size. Hardy and dependable.

Sir Thomas Lipton. Double, pure-white, fragrant flowers. Plants strong and vigorous.

WICHURIANA OR WHITE MEMORIAL

This is the trailing Rose that is used for cemetery purposes. They make a complete green blanket which will keep down the weeds and in June will be covered with waxy white blossoms.

MERCHANTISE

Price List on Page Thirty-one

We have a wonderful collection of the better named varieties of Hardy Phlox, much superior to the old-fashioned seedling phlox. They are field-grown plants of good size and certain to bloom the first season.

R. F. Strather. Deep carmine-pink with darker center. We sell more Struthers than any other variety.

Prof. Virchow. Very similar to Struthers, but not so tall a grower.

Rheinlander. About the same shade as R. F. Strather except that it is all one color and doesn't have the darker center.

Aetna. An orange-red with a darker center and white stamens. Quite different from any other variety.

Miss Liagard. Pure snowy white. The earliest bloomer of all.

Mrs. Jenkins. Pure white with round, compact heads.

Von Lassburg. Similar to Mrs. Jenkins, but smaller growing.

Richard Wallace. White with a dark pink center.

Prices on all Rose Bushes are as follows: 2-years old, dormant, field-grown plants, 50c each; 5 for $1.00, or $3.50 per dozen, postpaid.

May be all alike or assorted.

Bridesmaid. White with a fiery-red center; low growing.

Special French. Very large, light peach-pink flowers with dark centers.

Panthemun. Similar to Special French, but darker in color and without the darker centers.

La Vigne. Also similar to Special French, but flowers a little darker in color and heads a little more compact.

R. Comte. A dark wine red; low growing and extremely free blooming.

Champs Elysees. A little taller than R. Comte; flowers slightly larger and more of a purplish red.

Exclaireur. A little lighter shade than Champs Elysees, taller, larger flowers and streaked and spotted with white.

Lord Raleigh. About the same habit of growth as R. Comte, except that the flowers are lavendar colored instead of dark red.

Mrs. Jenkins Phlox

Phlox Subulata or Moss Pink. A variety of Phlox which trails on the ground, and is a perfect mass of pink flowers in April. Especially adapted to the Rock Garden.

Prices on Hardy Phlox is 25c each; 5 for $1.00, or $2.60 per dozen, postpaid, either all alike or assorted.

Achilles, Perry's White

Anthemis. The so-called yellow Shasta Daisy. Bloom is much like it aside from the color, which is a golden yellow. Very free blooming. 14 inches in height. Full sun.

Abies, Alpine or Rock Cress. Pure white flowers, produced in dense masses, splendid for border and rockery work. Low growing. Full sun.

Armeria, or Sea Pink. Attractive dwarf Perennial, masses of bright green foliage. Flowers in dense heads on stiff, wiry stems. Blooms continuously, Spring to Fall. 12 inches in height. Full sun.

Prices

Unless otherwise specified all Perennials are 25c each; 5 for $1.00; $2.50 per dozen, postpaid, of course.

SATISFACTION GUARANTEED—Our Slogan for OVER THIRTY YEARS!
pink blossoms. Pine for a hedge or semi-shade. 12 inches. May to frost.

BOLTONIA. Free-flowering small white Daisy; on stems ironi pink blossoms. Fine for rock gardens. Sun or semi-shade. 12 to 5 feet high, in September. Use in the background. In spires, sometimes called Summer Lilac. The woody stems pink, cup-shaped blossoms in June or July. Sun or

CAMPANULA, persicifolia. Finest of all Campanulas for a hedge. 3 to 4 feet. August to frost.

CHRYSANTHEMUM, Early Blooming. This is the im— tion. I honestly believe that this is the best strain of Delphiniums of Lavender bells about an inch long that bloom in Sept-

COTTINUS, Oriental. Very fragrant blossoms. Sometimes mistakenly called Pink Allium. The blossoms bloom along in August and Septem-

CROSSA ENDICH. A charming blue plant, blossoms late. 2 feet high. Semi-shade or after October.

DELPHINIUM, Bellmosa. 2 feet high. Very elegant little strain having a smooth blue blossom. June to frost. Each 50c; 2 for $1.00.

DELPHINIUM, General Wolfe. 2 feet high. Very fragrant and hardy. June to frost. Each 50c; 2 for $1.00.

DELPHINIUM, General Wolfe. 2 feet high. Very fragrant and hardy. June to frost. Each 50c; 2 for $1.00.

DELPHINIUM, Old Fashioned Honesty. —Our Policy for OVER THIRTY YEARS! Prices

Unless otherwise specified all Per-

FRNK, Hardy Madonna. Has fine very, black stems with delicate, finest—sented from which it gets its name.

FUNKIA, Subcordata Grandiflora. This is the case. Each 40c for flowering. Each 60c; for $1.00.

GYPSOPHILA, Double or Double Baby’s Breath. The flowers are used in the early, 5 to 6 feet tall. Likes a moist location. 3 feet. Sun or semi-shade. July—September.

PYRETHRUM (Painted Daisy). Flowers ranging from white to deep rose, fern-like, foliage that stays pretty all Summer, Decorates your garden. Day. Advise you to plant two or three to get differ-
cent colors, 18 inches. Sun. May-June.
RANUNCULUS. Trailing, daisy blossom, Buttercup with glossy green leaves, 6 inches. Sun. May-June.
RUDBECKIA (Black-Eyed Susan). Grow about 3 feet tall and during August and September, covered with very, very beautiful, black centers. A biennial. Prefer semi-shade, but will grow anywhere.

The Sedum or “Live-Forever” can stand any amount of heat and drought and comes in enough varieties to be very interesting, as follows.

Sedum, Spectabilis. Tall-growing with pale pink blossoms in Sep-
tember and October. Hot, sun locations. 1 to 2 feet.
Sedum, Brilliant. The same thing only a bright pink blossom, 1 to 24 inches high. Sun or semi-shade. September.
SEMPervivUM (Hen and Chickens). Little green rosettes which resemble cactus. Much used in the rock garden. 1 inch. Sun or shade.
STATICE LATIFOLIA (Sea Lavender). A rosette of broad, leathery, odd-looking leaves. Grows a foot or two high. Blooms are lavender colored, borne in masses like Baby’s Breath, only much finer.

HARDY VERBENA
Hardy. Looks just about like any other Verbena. Only it is absolutely hardy. Extra fine for memorial planting, as a couple of plants will cover a grave in one season. Just comes in one color, pink. Blooms all summer.

*NEW INTRODUCTION*—Regal Verbena. A new introduction resembling the old-fashioned Yucan, filamentos, except that the leaves are beautifully striped, green and white. 1-year plants 40 each; 2 for $1.00.

HARDY LILIES

Hemerocallis Flava (Lemon Lily). Lemon color. The flowers being large, very dark in color and very fragrant. Violets commonly grown in the Greenhouse for winter blooming. They are lavender colored, borne in masses like Baby’s Breath, only much finer.
Hemerocallis Middendorfii. Orange color, slightly larger than Flava. Blooms about same time.
Hemerocallis Fulva. Tall, dark brownish coppery color. Blooms through July.
Hemerocallis Kwanso. Same as Fulva above except it has double flowers.
Hemerocallis Thunbergii. Last of all to bloom, usually August. Pale lemon yellow. Blooms a little smaller than Flava, and grows much taller.

REAL QUALITY, FAIR PRICES, SQUARE TREATMENT—AT HENRY FIELD’S.
Thrifty, vigorous, young trees, ideal size for transplanting, at reasonable prices. Size and age most commonly used by commercial orchard planters everywhere. One and two-year trees will bear fruit as quickly as the three-year trees and are much more apt to live.

The PRICES on one year old trees include free delivery by parcel post or prepaid express. We guarantee safe arrival in good growing condition.

About Sizes of Trees. The one-year trees stood from two to four feet high, and the two-year trees from four to six feet high in the field. Before we ship them out, we cut them back just exactly as they should be for best results.

Lack of space prevents us from giving any descriptions of our fruit trees, but we only grow standard sorts, well known and liked by everyone.

Summer Apples
- Red June, Duchess, Yellow Transparent, Nantucket Blush and Wealthy
- Grimes Golden, Delicious, Jonathan, Stayman Winesap and NorthWestern Golden

Crab Apples
- Red Siberian and Whitney

We guarantee safe arrival in good growing condition.

FRUIT TREE PRICES
One-year trees go by mail, we pay the postage.

Two-year trees go express and you pay.

Prices on Apple Trees and Peach Trees, either all of one kind or assorted.

Prices on Cherry, Apricot, Pear and Plum Trees, either all of one kind or assorted.

CURRENTS AND GOOSEBERRIES
No, we do not handle either Currants or Gooseberries. There is so much red tape and Government quarantine on account of danger of their carrying White Pine Blister Rust that we would rather you bought them from someone else.

FRUIT TREE PRICES

STRAWBERRY-RASPBERRY

Ornamental SHADE TREES
FOR THE LAWN
Nothing sets off a house like a pair of good shade trees. You will find all of the best and most satisfactory varieties listed below. These trees with two exceptions will run around 6 feet high and are too large to go by mail. We have to send them by express at your expense. My advice would be to order at least four, so as to cut down on the express charges. The two exceptions are Red Bud and Bechtel's Flowering Crab.

Ornamental VINES
Lack or space prevents us from giving any detailed description of all the hardy Vines, so we are handling only those old well known and loved Hardy Climbing Vines which are so popular with everyone that no description is necessary at all. The postpaid prices on vines are given below.

Everbearing STRAWBERRIES

The Famous MASTODON

The Mastodon is the biggest and best strawberry we have ever tried out. It is certainly a world beater, big, dark red, solid, high flavor, that carries to market well. Plants are big and husky and produce a lot of fruit.

All summer and fall, we have been getting the most enthusiastic reports from people who have tried it out the past year, and they are all thoroughly convinced. We offer a compact and solid, very sweet and productive. Variety grown for market purposes. Ripens ten days before the June bearers. Hardy and very productive. Fruit is quite large, very firm and dark red in color.

RASPBERRIES

will do well in most any soil in any part of the country. We especially recommend the two-year-old transplants, as they are more sure to live. Cumberland is the best known of all the black raspberries; it is a dwarf grower, and hardy and of excellent quality. Black Pearl. Very hardy and prolific western variety of good size and color. Columbian is a purple variety. Berries large and of fine quality. Latham Red. An extra early red raspberry from Minnesota. Excellent. Cutthet Red. One of the oldest. Sweet fruit, ripens early, produces until frost.

All Raspberry Plants twice inspected for Mosaic and certified free from disease. See prices below. Prices as follows:

The Henry Field Guarantee

We have always been careful to select only the finest merchandise and the best Seeds and Nursery Stock. Of course, with that policy we are saving, giving every customer a honest-to-goodness guarantee — a guarantee that really means something.

Every order you send us will be guaranteed “Your Money’s Worth or Money Back.” I have always guaranteed complete satisfaction of my customers and you can count on that from me as long as I am in business.

HENRY FIELD.

**10 Grape Vines $1.00**

Well Rooted Plants Guaranteed

This collection contains the very best standard varieties in purple, white and red. Big, healthy vines that will grow and bear in any part of the country. We guarantee safe arrival of well rooted vines. For $1.00 you get 4 Concordors, best main crop; 2 Niagaras, best big white; 2 Agawams, best big red; 2 Moore’s Early, best early—or I will send one vine of each for 60c.

---

**3 Rose Bushes $1.00**

Your choice of the varieties pictured here, or any others listed inside this catalog. These are all big, heavy 2-year plants, with ample roots for quick growth. Furthermore, they are all perfectly hardy, and we guarantee to deliver them to you in perfect condition.

Any rose listed in catalog, 50c each; three for $1.00; or $3.50 per dozen.
